### **City of Miamisburg Selects uniSon Technology Group to Help Manage its Information Infrastructure**

*Tenant of The Entrepreneurs Center creating technology design*

**Dayton, Ohio, January 29, 2002**—uniSon Technology Group has been awarded a design contract for a three-year technology plan by the City of Miamisburg to lay the foundation for information technologies that will help the city fulfill its progressive vision for the future.

uniSon will design and implement a secure, city-wide network that will facilitate better communication within the organization, with its citizens, as well as store a variety of records, that in some cases are now only available in hard copy.

“The scalable network will expand the possibilities the city has to streamline its processes, improve service and offer new communication options,” said Doug Ellis, owner, uniSon.

“This project will tie all of the City of Miamisburg’s services and facilities together, electronically,” said Dody Bruck, assistant city manager. “uniSon has seasoned professionals with expertise in all the areas we needed: infrastructure, networking, hardware, software, security and Web design. They also have a flexible, realistic approach that works with our budget.”

uniSon, appropriately named, is the melding of four companies that now partner together to provide customers with a complete technology package. Together, the group has 20 employees. “uniSon simplifies the process of gathering a team of IT professionals,” said Doug Wade, owner, uniSon. “Clients receive one bill and a unified effort from different disciplines.”

uniSon is headquartered at The Entrepreneurs Center on 714 East Monument Ave and has satellite offices in Huber Heights and at the Mound Advanced Technology Center in Miamisburg.

#### **City of Miamisburg**

Miamisburg is a growing, vibrant, suburban community of approximately 20,000 residents located just minutes south of Dayton in Ohio's Miami Valley. It is an ideal destination for the 21<sup>st</sup> century—featuring a full-service local government, award-winning public schools, a wide range of housing options and a diverse commercial base. It is Ohio’s star city, where modern living meets historic charm. To learn more, call 937/866-3303 or visit [www.mvcc.net/Miamisburg](http://www.mvcc.net/Miamisburg).

### **uniSon Technology Group**

uniSon Technology Group provides custom, integrated business solutions that offer functionality, security and reliability, whether for a small project or large-scale system implementation. The group has the skills and experience to design, implement, manage and support information technology systems from conception to maintenance to expansion. uniSon brings years of technical expertise, professionalism and a caring attitude into every engagement, helping clients sort through the technological options available to find the right solution for their business needs. To learn more, call 937/281-6288 or visit [www.unisontechgroup.com](http://www.unisontechgroup.com).

### **The Entrepreneurs Center**

The Entrepreneurs Center in Dayton, Ohio, helps to control the conditions that cultivate new companies—and those enterprises, in turn, create jobs in the region. During their three-to-five year stay at the Center, tenants have access to business mentors; education and training; office and administrative services; debt and equity financing; free and/or reduced-rate services such as accounting and legal advice, as well as the benefit of networking with other tenants. The Entrepreneurs Center is among ten business incubators supported by the Thomas Edison program administered by the Ohio Department of Development. For more information, call 937/281-0098, fax 937/281-0099, e-mail [info@techincubator.com](mailto:info@techincubator.com) or visit [www.techincubator.org](http://www.techincubator.org).
